Annual  
Report 2023

# Yearly Achievement

## Editorial

---

Eng./ Abdul-Jabbar Al-Yousifi President  
of the Foundation - Chairman of the  
Board of Trustees

ofuq Foundation is ending its fourth year since its inception with educational projects and significant achievements in the field of education and rehabilitation. The Foundation is continuing the project to accommodate distinguished students who are unable to continue their university education and who are coming from the countryside of Taiz Governorate and neighboring governorates. The number of students benefiting from this service has reached (190) male and female students in various Scientific specializations.

At the level of humanitarian work organizations in Taiz Governorate, it is an educational scholarship project, whether fully or partially covered...

Since the inauguration of this project until now, the Foundation has provided approximately (50 fully covered bachelor's scholarships) as well as (182 (partially covered scholarships) at the level of public or private universities. All of these educational scholarships are allocated to help distinguished students from poor groups and the poorest who are unable to continue their education...

The Foundation has also provided scholarships for master's students (10 scholarships fully or partially covered)...The Foundation has other blessed efforts in the field of education, which is supporting student residence, whether with dry food supplies, from which 400 students benefited, or distributing solar energy. (65) students at the estate level in Taiz Governorate have benefited from this project...

The Foundation has also contributed to distributing charity to needy students, whether to help them with transportation costs or school fees about 260 male and female students benefited from this project.

The Foundation is continuing to build an orphanage and a school affiliated with it in Taiz City, with funding from one of the female philanthropists may Allah reward her with the best reward so that 60 orphans may benefit from the orphanage in its first phase, then in its second phase (120 orphans), with Allah's help...as well as other educational projects, which you will find detailed in this report (achievement report for 2023)...

In this context and with this urgency, we cannot help but express our gratitude and appreciation to everyone who helped the Foundation and provided it with a helping hand, from local or international humanitarian institutions, as well as from benefactors (men and women) at internally and externally as well...

I do not forget here to extend my sincere thanks and appreciation to the founding brothers and members of the Board of Trustees for their blessed efforts, each in their specialization and tasks, in order to develop the institution and expand its educational services for distinguished students, male and female, and from the poorest groups... My thanks go to the staff of the institution and the student housing administrators who teach day and night and perform their missionary role despite the severity and cruelty of the economic conditions. They have all my thanks, appreciation and gratitude.

I will not forget the tremendous efforts of the volunteers in this noble work at the internal or external levels. They are truly the unknown soldiers who continue to strive with every effort to market the foundation's projects or implement them on the ground. For everyone, we pray to Allah to grant them success, help them, and reward them with the best reward. And to bring goodness to those who give, and to those who seek reward, exaltation, happiness, and joy...

## Gone & Left his effect ...

Commiseration written by/Eng. Abdul Jabbar Al-Yousifi, Foundation Chairman

Mr. Muhammad Ali Ismail, may Allah have mercy on him, was one of the first initiators to establish ofuq Foundation for Education and Development, and after that he was an active member of the Foundation's Board of Trustees...

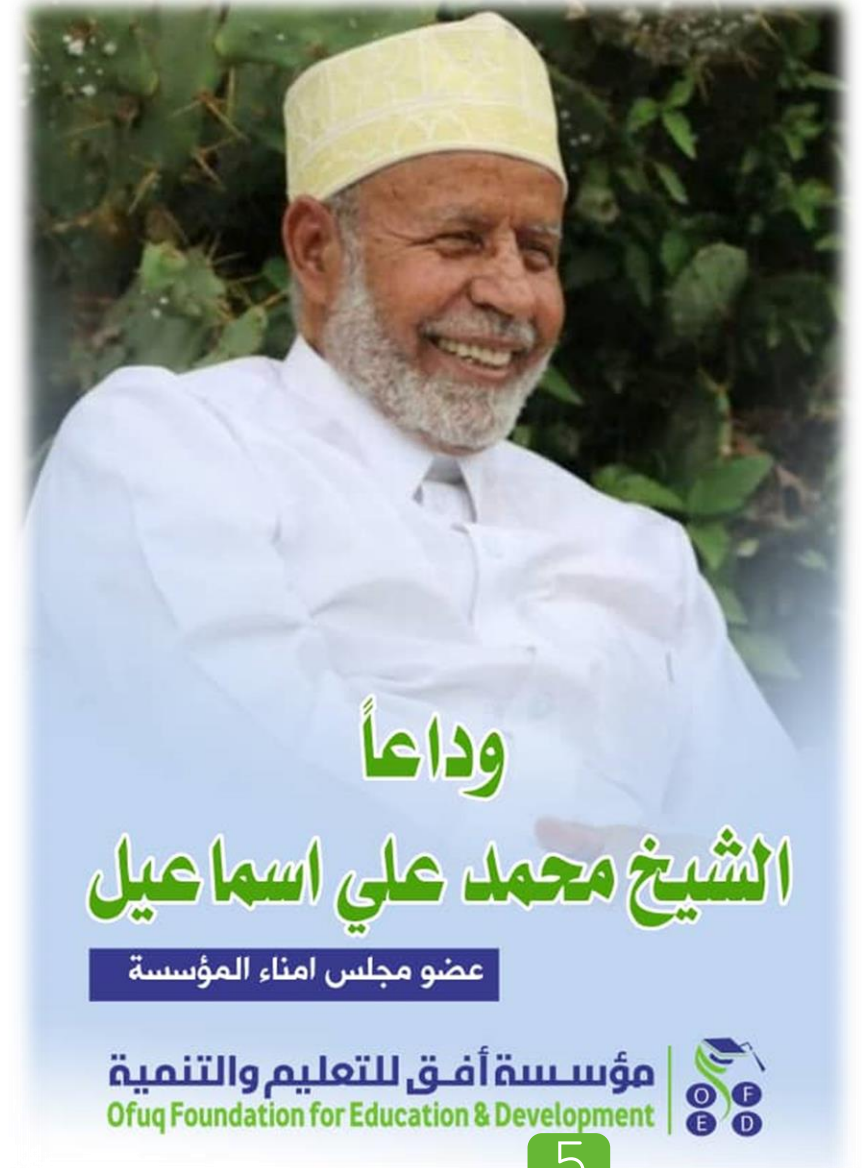

He, may Allah have mercy on him, believed in the importance of education and rehabilitation and their importance in the advancement of societies. He also strongly believed in the necessity of charitable and humanitarian work to devote much of its attention to issues of education and rehabilitation.

Therefore, may Allah have mercy on him, he was enthusiastic about establishing and announcing ofuq Foundation as an institution specializing in education only, in order to give this aspect the attention and focus that befits it. For him, ofuq Foundation was an attention and a concern, a concern that inhabited him, and an interest that occupied him, and I noticed in every word of his words and in every sentence . In my conversations and discussions with him, and even in every letter, I noticed the concern of developing the institution and its foundation, which is what we all worked for as founders and Board of Trustees to make great strides in this field, and a lot still awaits us, and from Allah alone we derive strength and longevity in walking on this path..

As ofuq Foundation bids him farewell with great sadness and grief, and pays tribute to all his works, achievements, contributions, and unforgettable imprints, starting from the founding efforts to the development efforts... as we pray to Allah Almighty to accept him in the heavens with the prophets, martyrs, and righteous people, and as a good companion to those. Here and in this regard, I still remember that the last message he sent to me while I was outside the country via social media and shortly before his death was because of male and female scholars.

This is the message of great people like him. He lived great and left great May Allah have mercy on this scholar and the ones who work for education...

As we at ofuq Foundation mourn him and grieve, we pledge to Allah that we will follow in his path and steps, working for the sake of education and helping the distinguished groups of students and the weakest and the poorest, with the effort and ability we possess until we meet Allah for that... We ask Allah to compensate the institution with a man with his determination and interest, he alone, Glory be to Him, is the One who has the power to do this.

# Summary Introduction

## Our Vision

Pioneering locally and regionally in caring for students, developing the skills of society members, encouraging innovation, scientific research, and supporting educational issues.

## Our Message

ofuq Foundation for Education and Development seeks to contribute effectively to solve the problems of society by sponsoring Yemeni students, developing life skills for community groups, encouraging creativity, innovation, scientific research, and advocating for educational issues.

## Our Fields of work

The project aims to increase the opportunities for scientific excellence among university students, through the accommodation of poor male and female students coming from rural areas in Taiz Governorate and neighboring governorates in the institution's residences during the undergraduate and postgraduate studies, provision of daily food, water energy, internet and health services, and ensuring that the enrolled students in the dormitories are provided with appropriate, safe and calm environment for academic achievement.

## Housing

190

Beneficiary Student

Housing

Through the educational scholarship project, the Foundation targets male and female students who were unable to enroll in university and higher education due to their living conditions, even though they are distinguished and have ambitions and passion for education. It covers the educational expenses of dozens annually in various specializations. The Foundation was a pioneer in this field and the first among civil society organizations in Taiz to provide educational scholarships to distinguished students from the poorest groups.

## Orphanage & School

The project is located in the area of Taiz - Al-Hasab - Wadi Al-Uqaibat. The area of the project site is (1357) square meters. The place will be allocated to build an orphanage and an attached school for the rehabilitation of orphans with the support of a female philanthropist.

As a first stage, 60 orphans will benefit from the project once it is launched, and the number will increase to 120 orphans at a later stage once the special school for orphan rehabilitation is established.

For students  
of charitable  
student  
housing

**Ghada Mahmoud Yehia Mohammed**

College of Applied Science

Chemistry Department

First Rank

I thank ofuq Foundation and those responsible for it, who had the credit, after Allah, in giving me the opportunity of a seat in the institution's female student housing. My thanks will not be enough for them. If they had not accepted me in this place, I would not have completed my university studies. This is because I am a rural girl and in my family's customs a girl does not live far from her family and they fear for me. If this housing wasn't available, they would not have allowed me to stay in another place. I have benefited from the services provided by the housing, which played a role in my academic excellence, and I now work as a teaching assistant at Al-Rowadl University.

I thank ofuq Foundation and those responsible for it, who had the credit, after Allah, in giving me the opportunity of a seat in its female student housing. If they had not accepted me in this place, I would not have completed my university studies. It was my only chance as a rural girl, and our customs do not allow a girl to stay in the city alone. However, this residence is considered my second home, and I have benefited from the services provided there, which played a role in my academic excellence. I now work as a teaching assistant in the same college from which I graduated.

From the heart, with gratitude and appreciation, to all the benefactors in ofuq Foundation, whose generous hands have worked hard with goodness and their great souls for giving, bestowing, and searching for support and effort in order to support students of knowledge and stand by them by them to provide their material needs of housing, food, and water, training them and developing their skills, headed by a man of goodness, Eng. Abdul-Jabbar Al-Yousifi, may Allah protect him. I am among these beneficiary students, extend my thanks and gratitude to all workers in this blessed institution. May Allah reward them on our behalf with the best reward. 🌹

I extend my thanks and sincere affection to the entire staff of ofuq Foundation, headed by Eng. Abdul Jabbar, those who contributed greatly until we reach this moment full of pride and in which we have hope for a bright future. You were our family, friend, and brother. You helped us a lot. You saved us from our pain, with or without our knowledge. You were the source of help and joy. If each one of us had the gold of the world in his hands, he would not only give the gold, but rather he'll give his arm. We will not forget this beautiful thing for you as long as we live, and we ask Allah to accept and reward you in your coming days. 🌸

## **Mustafa Fahmi Abdel Wahab**

Faculty of Medicine

Al-Rowad University

Free scholarship

Average: 90.26%

I am one of the students who received free scholarships offered by ofuq Foundation – Al-Rowaud University in the College of Oral and Dental Medicine and Surgery, for the year 2022/2023, with an average of (90.26).

I would like to extend my thanks and gratitude to ofuq Foundation. You have been the source of inspiration and success for us. You have been the best help for us in our journey. You have been the hope and the symbol of giving. Thank you because you have been an asset to rely on, so that our success may reach the sky. I also extend my sincere thanks to the entire administrative body and every crew of the Foundation, headed by the philanthropist and spiritual father, Eng. Abdul-Jabbar Al-Yousfi.

Taiz University  
Free scholarship

Thanks, appreciation and gratitude to all employees of ofuq Foundation, led by Eng. Abdul-Jabbar Al-Yousifi, for the support and encouragement they provided to me. Credit to them, after Allah Almighty, for supporting and encouraging me to study master's degree in financial accounting at Taiz University , where ofuq Foundation covered the costs of my studies as well as the transportation costs to the university as I am physically disabled. I am now testing the third term, and if Allah wills, I will discuss my master's thesis soon. We will never forget your kindness as long as we live. May Allah reward you with the best reward and direct your steps on the path of goodness.

Free scholarship

Thanks and appreciation to ofuq Foundation and its employees, led by Eng. Abdul-Jabbar Al-Yousifi, who contributed to financially supporting us and on an ongoing monthly basis to meet the academic requirements. Without their support, we would not have achieved this excellence crowned with success and prosperity. Our thanks and appreciation to all staff of the foundation in general and to the caring father, Eng. Abdul-Jabbar Al-Yousifi, in particular, who has the first credit for this support for his tireless endeavors. If something appreciated were given to him, we would give him the signs of our superiority, and we are confident of his overwhelming joy at this superiority. We ask Allah to grant them goodness and blessings and place their efforts in the balance of their good deeds
