Yearly Achievement

**Eng./ Abdul-Jabbar Al-Yousifi President of the
Foundation - Chairman of the Board of Trustees**

Editorial

Ofuq Foundation for Education and Development ends its fifth year with remarkable achievements in the field of education and rehabilitation for distinguished and poor male and female students at different stages of education. You will read in the folds of the report in detail the achievements of the Foundation during the year 2024. Here, the Foundation extends its sincere thanks and gratitude to everyone who contributed to the success of the Foundation's various educational projects, whether from local or international supporting institutions, or from benefactors, men and women inside and outside Yemen. Thanks are extended to the various bodies in the Foundation for their solidarity and cooperation in the success of the Foundation's projects included in the Harvest Report for the year 2024

The project aims to enhance opportunities for academic excellence and distinction among university students by providing suitable housing for male and female students from poor families coming from rural areas in Taiz Governorate and neighboring governorates.

Beneficiaries can reside in the Foundation's housing during their undergraduate and postgraduate studies, where they are provided with daily food, water, electricity, and internet services in addition to health services. The project ensures that male and female students residing in the housing have a suitable, safe, and quiet environment that enhances their ability to achieve academic achievement and helps them achieve their academic goals.

Housing

Through the educational grants project, the Foundation aims to provide support to male and female students whose living conditions prevented them from enrolling in university and higher education, despite their excellence and great ambitions in the field of education. The Foundation covers the educational expenses of dozens of these students annually in various specializations, including: **197** bachelor's scholarships, **10** master's scholarships, **4** doctoral scholarships, **6** diploma scholarships, and **343** university students who receive a monthly transportation allowance. The Foundation has emerged as a pioneer in this field, to be the first among civil society organizations in Taiz to provide free educational grants to outstanding students from the poorest groups.

Orphanage School

The orphanage and school project is located in the Taiz area - Al-Haseb - Wadi Al-Aqibat, on an area of (1357) square meters. The project aims to establish a home for orphan care in addition to an attached school for their rehabilitation, thanks to the support of charitable woman. In the first phase, 60 orphans will benefit from the project's services upon its launch, and it is expected that the number of beneficiaries will increase to 120 orphans in a later phase, if the school for the rehabilitation of orphans is established.

Student's Housing
Feeding

Our training and qualification program seeks to achieve important goals by focusing on developing the basic skills of students and employees. In this context, we aim to:

- 1 - Train male and female students residing in the institution's housing on the necessary skills required by the labor market; This includes providing specialized courses such as the International Computer Driving License, in addition to first aid courses, and other vital skills that prepare them to face professional challenges.
- 2 - Qualify the institution's employees by providing advanced courses on how to prepare projects, formulate plans, and prepare reports; as we aim to enhance their capabilities in project management and improve the quality of institutional work.

Success Stories of Charitable Housing Students

Mohammed Abdulraqueeb Mohammed
Medicine Faculty- Taiz University
General Medicine and Surgery
Rate : Excellent

I grew up and received my education in Jabal Habashi District, Taiz Governorate, in a modest environment full of challenges but rich in values and family support. I had a great ambition to become a successful doctor, so I worked by all means to achieve my dream and ambition, knowing how difficult this path is. The Excellence Housing of Ofuq Foundation for Education and Development played a very important role in my educational journey in providing a calm and stimulating study environment away from the pressures of daily life, which allowed me to focus on studying and academic achievement. The Excellence Housing represented a real turning point in my life, including saving time and providing opportunities to interact with colleagues, exchange experiences and ideas, which enriched my educational experience and broadened my horizons. I extend my sincere thanks and gratitude to Ofuq Foundation for Education and Development, which provided me with the necessary support during my educational journey. The Excellence Housing was the cornerstone for achieving my dreams and reaching this academic level.

Success Story¹

Sample Student's Housing Success Stories

Mariam Faisal Al-Haidariy
Al-Rowad University - College of Medicine
Dentistry Department
Rate: Excellent

I grew up and received my primary and secondary education in a rural area in Taiz Governorate, far from the city, and I used to get the top positions among students in all grades. Since childhood, I dreamed of becoming a doctor in the future, but there were two problems that were difficult to overcome: the girls in my village and some neighboring villages stop their education after completing high school. The other problem was where I would stay or live during my university studies, as we do not have family or a home in the city. My family's hope and ambition were almost shattered, but one of my father's friends told him that there is a charitable university housing for girls affiliated with Ofuq Foundation for Education and Development. We went to Taiz City, which was the first time I visited the city to register at the university and then register for the housing, and I was accepted. The housing played a major role in providing the appropriate educational environment, in addition to what it enriched us with in terms of knowledge, culture, and education. If the housing was not available at that time, my education would have stopped after high school. In conclusion, I would like to express my sincere thanks and appreciation to Ofuq Foundation and all its employees who make great efforts to provide housing requirements.

Success Story 2

Sample Student's Housing Success Stories

Asmaa Saeed Abdullah
Taiz University - College of Education
Psychological Counseling
Rate: Excellent

I grew up in Al-Hodeidah City and moved to Taiz City, Al-Raheda district. I studied primary and secondary school there and worked as a teacher and supervisor in a private school in Al-Raheda in the morning and taught memorization in the evening, all to help my family with life's requirements and support them. I dreamed of studying at university in a reality that rejects and denounces girls studying away from their families, and on the other hand, the financial circumstances do not allow it. In the second year of my graduation, my school surprised me by registering me at the university and in one of the student residences affiliated with Ofuq Foundation. I was very happy about that, and so were my family, who were very happy with the news because they consider me a beacon of hope for them. With Allah's help, I traveled to Taiz, and I was afraid because I did not have family in the city, but the Excellence Residence eliminated all these fears from me and was a starting point in my life. The residence was keen on developing us intellectually, culturally, behaviorally and educationally. I completed my bachelor's degree, then joined the master's degree and began working as a supervisor in the female student residence and as a secretary in the Dean's office at the Higher Institute for Health Sciences. I thank Ofuq Foundation for Education and Development for their efforts to ignite the torches of knowledge and work.

Success Story 3

Sample Student's Housing Success Stories

Asrar Saif Ahmed Naji
Taiz University - College of Medicine and Health Sciences
Higher Nursing
Rate: Good

I grew up in Jabal Habashi Directorate and my educational journey from primary to secondary school began in a school in our isolation. My ultimate goal was to become a doctor, and I remained determined and confident that I would achieve my goal despite the difficulties I faced. I used to walk eight kilometers to reach the main street to continue on the bus to go to university, and this was very tiring, until I learned about the Excellence Housing affiliated with the Ofuq Foundation for Education and Development and its proximity to the university and the services it provides to female students. I went and registered in it and was accepted, so that there were only a few steps between the dream and reality, and I could see my university from the window of my room instead of the distance I used to travel to get to the university. This housing played a major role in providing comfort, psychological stability, safety, food and drink. I used to miss many lectures because of the roughness of the road from the countryside to the main street and the difficulty of obtaining transportation. The housing worked to develop us intellectually, culturally, socially, morally, spiritually and scientifically, and to learn from others. I would like to express my sincere thanks and appreciation to Ofuq Foundation and the educational family for the efforts you have made to provide a stimulating educational environment that contributed to developing my skills and played the biggest role in my success.

Rate: Excellent / Rank: Tenth

Success Story 5

Sample Student's Housing Success Stories

Seeking knowledge is a duty for every Muslim, as it is the key to achieving progress and prosperity in societies and an essential element for achieving comprehensive development and human well-being. My beginnings were in the countryside, where I received my first education and my journey with success began since I knew myself, as I always achieved first place in my primary, preparatory and secondary education. After completing my education at school, I decided to join the university, and here I began thinking about a place to live that would stand between me and my dream. After searching, I found the Student Excellence Housing affiliated with the Ofuq Foundation for Education and Development, so I decided to join it, so I applied for registration and an interview, and I was accepted, by the grace of Allah, into this model housing. The role of the residence was like half of my university journey, as it provided us with an environment for learning and studying and made many of the difficulties we faced easier. It was and still like home for us where we feel comfortable and reassured. If it had not been there, we would not have reached where we are now. It was like a starting point for achieving goals and ambitions. From here, I send a message of thanks and gratitude to Ofuq Foundation for Education and Development for what it has provided and continues to provide, a lot of support and necessary care for our colleagues in the student residences. All thanks and appreciation to the captain of the ship, Engineer Abdul Jabbar Al-Yousfi, and to all the workers in the foundation.

Success Story 2

Sample Scholarship Student Success Stories

I grew up and received my education in a rural area in Taiz Governorate and achieved advanced positions during my primary and secondary education. I had ambitions but did not know how to face them or how to achieve them. I faced difficulties in doing so until I received the scholarship provided by Ofuq Foundation for Education and Development. Then, I began to work hard and persevere and achieved first place during my university studies. However, if the scholarship had not been available, I would have faced many difficulties and challenges and would not have reached where I am now. Note that the scholarship helped me a lot by providing all tuition fees, which saved me a lot of effort and trouble in searching for fees. This in turn led to the development of my abilities and motivated me to compete and succeed. In conclusion, I would like to express my sincere gratitude and appreciation to Ofuq Foundation for Education and Development and all its employees for their efforts, support and cooperation with their students.

Anfal Salim Abdulrahman Muhammad
Al-Rowad University - College of Medical Sciences
Laboratories
Grade: Excellent / Rank: First

I grew up in one of Taiz Governorate villages and received my primary and secondary education there. I memorized the Holy Quran in the second year of secondary school and obtained 99.75% in the third year of secondary school. I applied to study medicine or medical laboratories at Taiz University, but I was not lucky and was not accepted in either major. After that, it was announced that scholarships were available from the Horizon Foundation for Education and Development in many majors. I applied for the medical laboratories major and was accepted and won first and second place during my studies. Note that the scholarship was a golden and very valuable opportunity to complete my educational journey and achieve my dream. It provided me with great assistance in this regard. If the scholarship had not been available, I would have faced many difficulties and challenges during my educational journey. All of this is due to Allah's and then Ofuq Foundation for Education and Development. May Allah reward them for the assistance they provide to students.

Success Story 3

Sample Scholarship Student Success Stories

Maha Nasser Abdel-Baqi Abdel-Wahab
Al-Rowad University - College of Engineering
Medical Equipment Engineering
Excellent Grade / Rank: First

I grew up and received my education in Taiz Governorate, and thank to Allah I always won first place in my classes, and in the third year of secondary school I won first place on Republic of Yemen level. Unfortunately, I did not receive any appreciation or attention from the government. However, I did not give in to frustration, but rather set my goal in front of my eyes and decided to study medical equipment engineering, as it is a rare specialization in many Yemeni universities. My destination was Al-Rawad University, as this specialization is available there. It happened that I learned about the scholarships offered by Ofuq Foundation for Education and Development to support students. I registered for the scholarships and passed the test with an excellent result and received a scholarship. The scholarship had a great impact on my life due to the economic collapse and financial pressure on the family. Finally, I would like to extend my thanks and appreciation to Ofuq Foundation for Education and Development for its efforts in supporting male and female students, whether by providing housing or by offering competitive scholarships.
